

GRYPHON FLEXIBLE FUND OF FUNDS – 30 JUNE 2017

FUND PROFILE & PERFORMANCE OBJECTIVE

The primary objective of the fund is to generate real (after-inflation) wealth for investors, at lowest possible cost, with due cognizance of risk and in particular secular down side risk. This is achieved by consistently producing real returns and long-term capital growth through maximum exposure to equities (the asset class of choice over the long-term to protect investors against inflation) during bull markets, whilst minimising exposure to equities in secular bear markets. As such, the product is suitable for investors of all ages as it maximises return per unit of risk throughout their various life stages.

INVESTMENT POLICY & STRATEGY

The portfolio is premised on the philosophy that most value is added with asset allocation rather than with stock selection. Stock selection is indexed and asset allocation is actively and aggressively managed to the extreme. This, coupled with our low cost focus (utilizing indexation building blocks), has the objective of achieving superior investment returns. The portfolio investment strategy is to invest in a flexible combination of the Gryphon All Share Tracker Fund, Gryphon Money Market Fund, Gryphon Global Equity Fund, offshore cash and bond/property indexed products. Funds are allocated between these alternatives based primarily on proprietary quantitative indicators, which predict the primary bull / bear market cycles in equities and the Rand currency. Short term equity volatility and secondary market cycles are generally ignored, since they are more difficult to predict and their effect on portfolio returns relatively small and short lived. The Portfolio can invest up to a 100% in equities (including international equities). Maximum foreign exposure limits as permitted by prevailing legislation (currently 25%), apply.

WHO SHOULD INVEST?

- Investors seeking long term exposure to equity market returns, but cognizance of downside risk.
- Investors who have a long-term investment horizon and a required return profile in excess of inflation and which thus necessitates exposure to equities.
- Investors lacking the time, infrastructure or resources and/or investment sophistication to choose between and subsequently monitor the performance of: various asset classes i.e. asset allocation; and/or individual stocks i.e. stock selection; and/or individual asset managers i.e. manager selection.
- Investors cognizant of the effects of costs on their returns.
- Multi Asset Funds are more tax compliant and tax efficient.

The fund is particularly attractive to investors from a diversification point of view, since the unique way in which it is managed, differs significantly from its peers.

Further information regarding the Gryphon Flexible Fund of Funds is available on our website www.gryphon.com or by contacting us on 021 915 5100 or at invest@gryphon.com

ASSET ALLOCATION

FUND DETAILS

Sector Classification:

GRYPHON MARKET COMMENTARY – 30 JUNE 2017

THE PAST												
INTERNATIONAL						LOCAL						
<p>Global equity markets continued the trend of positive US Dollar returns in June. For the year-to-date MSCI Emerging Markets achieved +18.6% against Developed Markets +11.0%. Not only has more positive earnings momentum assisted the performance of Emerging Markets, currency appreciation against the dollar has also helped. The UK election early in June, was not favourable for Theresa May and her gamble on a snap election failed. In the U.S. markets appear to be growing weary of President Trump's inability to enact domestic stimulus, however, economic growth has matched or exceeded expectations. The FOMC hiked 25bps as expected. The oil price continues to be weak.</p>						<p>The local market returned -3.5% for the month, continuing the weak trend of May. For the year-to-date, equities have returned +3.4%, Bonds +4.0% and Cash +3.7%. Moody's cut our foreign-and-local currency ratings and kept the outlook at negative. Proposed mining legislation caused havoc on resource counters; however, the prospect of a judicial review resulted in the restoration of some value towards month end. Barclays PLC sold its stake in ABSA down to below 15%. Telkom and Gold shares bore the brunt of selling on the JSE.</p>

THE FUTURE												
INTERNATIONAL						LOCAL						
<p>The recently released FOMC Minutes continue to reflect a measured approach to hiking interest rates in the U.S. However, the stage has been set for the winding down of the Balance Sheet. Recent strength in the Eurozone and the ECB's assessment that economic risks are balanced, rather than tilted to the downside has seen the dollar weaken against the euro. Impending elections in Japan have not attracted much attention yet, however, we remain concerned that political risk globally is being underestimated.</p>						<p>The ANC Policy Conference suggests that the succession strategy followed by Deputy President Ramaphosa may be gaining some ground. However, it also confirmed the deep divisions within the ANC. Vehicle sales for June reflected muted growth. However, this was against fairly negative expectations and this and increased electricity usage has given some economists hope that the economy may be holding up despite the political turmoil. Government intervention in healthcare and proposed debt-forgiveness is a reminder to investors not to overpay! Debt-forgiveness is likely to be negative for our credit clothing and furniture retailers. The SAA bailout won't fly!</p>						
OUR FUNDS												
RISK	GRYPHON FUND					POSITIONING						
LOW	Money Market Fund					Conservatively managed, superb yield.						
↑	Dividend Income Fund					Enhanced before tax yield of over 10.00%. A stable interest rate cycle increases the attraction.						
	Prudential Fund of Funds					Aggressively exposed to SA equities and SA properties. Regulation 28 compliant.						
	Flexible Fund of Funds					Aggressively exposed to SA equities and SA properties.						
↓	All Share Tracker Fund					Lowest cost, superbly diversified exposure to equities.						
	HIGH	Global Equity Fund					Low cost exposure to the internationally diversified with associated currency benefit.

FAIS NOTICE and DISCLAIMER: This document is a minimum disclosure document. Collective Investment Schemes ("CIS") or Unit Trusts are generally medium to long term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future. Fluctuations or movements in exchange rates may cause the value of the underlying international investments to go up or down. CIS unit prices are calculated on a net asset value ("NAV") basis, which is the total value of all assets in the portfolio including income accruals and less any permissible deductions from the portfolio. Forward pricing is used. A schedule of fees, charges and maximum commissions is available on request from Gryphon Collective Investments. A Fund-of-Funds is a portfolio that invests in other portfolios of CIS (Unit Trusts), which levy their own charges, which could result in a higher fee structure for the Fund-of-Funds. A money market portfolio is not a bank deposit account. The value of the price is on an accrual basis. The total return is made up of interest received and any gain or loss made on any particular instrument; and in most cases the return will merely have the effect of increases or decreases in the daily yield, but in the case of abnormal losses it can have an effect of reducing the capital value of the portfolio. Excessive withdrawals from the portfolio may place the portfolio under liquidity pressure; and in such circumstances a process of ring-fencing of withdrawal instructions and managed pay-outs over time may be followed. Gryphon Collective Investments reserves the right to close and reopen certain funds from time to time in order to manage them more efficiently and in accordance with mandates. The fund manager may borrow up to 10% of the market value of a portfolio to bridge insufficient liquidity. The CIS are traded at ruling prices and may engage in securities borrowing and scrip lending. Portfolio performance is based on a lump sum investment, calculated on a NAV to NAV basis and does not take any initial fees into account. Income is reinvested on ex-distribution date. Total return performances are published. Performance figures used are on an annualised basis and are the figures as at month-end quoted against relevant benchmarks for a minimum period of one rolling year and in multiples of full years for periods longer than one year. Actual investment performance will differ based on the initial fees applicable, the actual investment date and the date of reinvestment of income. The Total Expense Ratio ("TER") is a measure that can be used by investors and advisors to determine how much of a Financial Product's underlying assets are relinquished as payment for services rendered in the administration of the Financial Product (e.g. manager fees & charges, administration fees and charges and VAT thereon, etc.). Transaction Costs ("TC") is a measure that can be used to determine the costs incurred in buying and selling the underlying assets of a Financial Product (e.g. brokerage, VAT on brokerage, securities transfer tax, etc.). TER's & TC's are expressed as a percentage of the daily NAV of the Financial Product calculated over a period of three years on an annualised basis. TC's are a necessary cost in administering the Financial Product and impacts Financial Product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Financial Product, the investment decisions of the investment manager and the TER. A higher TER & TC does not necessarily imply a poor return, nor does a low TER & TC imply a good return. The current TER & TC may not necessarily be an accurate indication of future TER's & TC's. Gryphon Collective Investments and the portfolio manager(s) cannot guarantee the capital or return of the portfolio. Gryphon Asset Management (Pty) Ltd, (FSP 581) is a licensed financial services provider in terms of the Financial Advisory and Intermediaries Services Act 37 of 2002.
